

Questica SE

The most advanced and intuitive ERP system developed exclusively for "Engineer to Order" custom manufacturers.

Industry Developed

Questica 2000, the flagship product of Questica Inc., was developed, with the collaboration of five custom equipment companies to ensure the system would meet the unique needs of ETO manufacturing. Today, with scores of clients and more than 15 years of experience and development, Questica SE (our SQL edition) is unrivaled in power and performance.

Exclusively ETO

Unlike other systems designed to suit several types of manufacturing, Questica SE is solely designed for the ETO manufacturer. Questica SE is the only system designed from inception exclusively for the custom design ETO company. Every single Questica client is an ETO manufacturer.

Proven

Our clients, all ETO manufacturers like you, rave about how Questica SE has helped transform their business, freeing up critical staff and increasing profits. Testimonials from our clients can be found at www.engineertoorder.com

Practical

Because Questica SE was developed by and for ETO manufacturers, you will be surprised how closely it matches the way you naturally do business. The result is a system that is easy to learn and quick to implement

Powerful

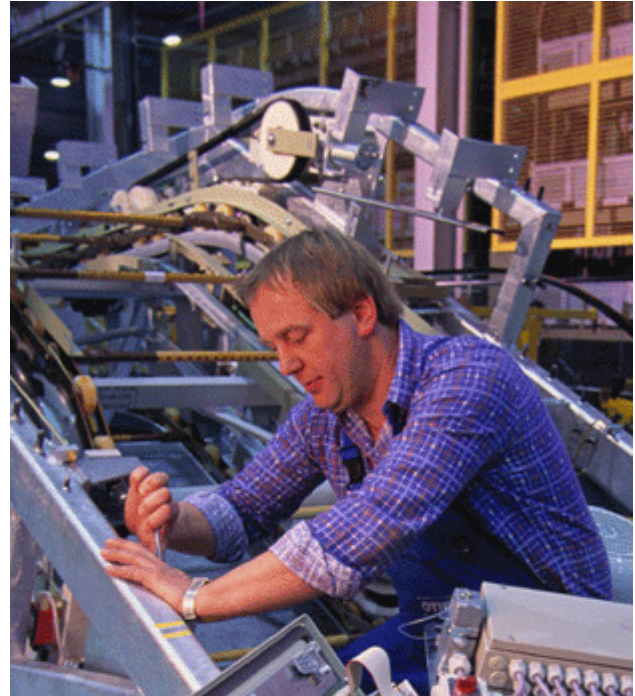

Questica SE, developed on SQL Edition, is a full-featured system. The seamless integration with MS Office results in a system that is fast, flexible and suited for both small and large networks. It is the most advanced and intuitive system for ETO manufacturing on the market

Fully Supported

Our biggest advantage is people and experience. Our dedicated consultants will work with your staff to ensure that Questica SE is used to its greatest capacity and to best suit your needs. From on site training and implementation to telephone and web conferencing support, your staff will be able to access a large pool of practical knowledge.

Valuable

Questica SE allows you to eliminate information duplication, speed up the time from order entry to shipment, provides you with real time costing and critical management information. Freeing up your most valuable resource, your staff, from costly clerical tasks to focus on their skills means more output and higher profits. Questica SE can allow your company to unleash its full potential.

Questica SE can dramatically improve your productivity, management control and profits.

Who is Questica?

Industry Experts in ETO Business Management

Questica's founders are industry executives with hands on experience running custom design businesses. We think like you. We understand the challenges you face in running your business and we know we can help make your business better.

Developing an advanced and intuitive system for ETO manufacturers has been our sole focus. Every one of our clients is a manufacturer of custom design equipment. They are the best judges of our abilities. Just ask them.

What is Questica SE?

Our SQL Edition Full Business System

Questica SE is a software solution, which ties together your key business processes into an efficient integrated system. Selling, Estimating, Order Management, Engineering, Procurement, Production, Costing, Accounting and Project Control are tied together into a single process.

Who is Questica SE for?

Engineer-to-Order Manufacturers

Unlike most ERP systems that claim to suit many types of businesses, Questica SE was exclusively designed for ETO manufacturers. If the majority of your orders require engineering effort prior to ordering materials, then you are an ETO manufacturer.

If you don't have an integrated business system and are looking for a practical solution that is powerful; a system that helps you streamline your business without tying your hands in bureaucracy; a system that is full featured but easy to implement; a system that is advanced and, above all, proven; then Questica SE is the solution for you!

How is Questica SE an ETO solution?

Superb Change Management

One common trait that is unique to all ETO businesses is the need to deal with constant changes throughout the life of each project. Design changes, order changes, delivery changes, all stall projects in Engineering, complicate material ordering, delay manufacturing and increase project costs. If this describes your business then you need a system that breaks down your productivity roadblock by simplifying the handling of on-the-fly changes. Questica SE is that system.

How will Questica SE help me?

Increase Productivity and Profits

If you experience any of the following:

- Struggle with the difficulty of getting real time job costing
- Frustrated with the stoppages in Engineering or the confusion created in Purchasing because of design changes
- Annoyed with entering the same information over and over again or the inability to get useful management information
- Irritated by the added bureaucracy that comes with your ISO quality system

We can help.

Questica SE will dramatically simplify your business, speed up production and provide real time management information. The net result is a more competitive and a more profitable company.
